

Chemist Management System:-

A Chemist Management system is a system where all the details of the medicines purchased are stored with details like `medicine_id`, `medicine_name`, `medicine_company`, `medicine_exp_date`, `medicine_count`, `supply_mode`(Mini truck, delivery_boy), `supply_type`(carton, strips, loose). Here a small part of implementation has to be done which are as:-

Create a class called `chemist_mgmt` with above attributes and store the database for 30 medicines.

Specific task Group Member-1

1. Display all the medicines whose names start with 'P'
2. Display all the medicines whose expiry date is within next seven days.
3. Display all the medicines whose count is less than 10 strips

Specific task Group Member-2

4. Display all the medicines sorted by `medicine_company`.
5. Display all the details of all the medicines whose `medicine_company` is 'Ranbaxy'
6. Display all the medicines names whose `supply_mode` is 'Mini Truck'

Specific task Group Member-3

7. Display all the medicines sorted according to `supply_type`.
8. Display all the medicines who are supplied by the delivery boy.
