

## Online Food Order Management System

An Online Food Management system is a system where all the details of the food orders like order\_id, order\_product, order\_location, order\_serving, order\_person\_name, contact\_no, order\_delivery\_time, order\_category, delivery\_type(hand picked / deliver by delivery agent). Here a small part of implementation has to be done which are as:-

Create a class called online\_food\_\_mgmt with above attributes and store the database for 25 orders.

### Specific task Group Member-1
