

Vendor Product Advertisement System.

The project is concerned with Advertisement of the vendors product. Vendor has to do the advertisement of his product. The software should add the new vendors, vendors can validate themselves by giving their login/passwords and the vendor can perform his activities for the addition of the product and deletion of the product. The customer can view the vendor, search the product by name and view the product from inventory. Write a menu driven program. The menu should contain the following:

1. Login/password for vendor/customer
2. Vendor registration in the software
3. Search product.
4. View the product.
