

Online jewellery Management System

An online jewellery Management system is a system where all the details of the products like jewel_id, jewel_type(diamond/gold/platinum), jewel_manufacture_date, jewel_count, jewel_price, jewel_company, jewel_return_allowed(yes/no), jewelery_category(ring/ necklace, bangles)). Here a small part of implementation has to be done which are as:-

Create a class called jewellery_mgmt with above attributes and store the database for 25 jewellery.

Specific task Group Member-1

1. Display all the jewelry items which are of either gold or platinum
2. Display all the jewelry items for which return is allowed.
3. Display all the jewelry items that are provided by 'S & S' manufacturers.

Specific task Group Member-2

4. Display all the jewelry items whose count is less than 10 available currently with us.
5. Display all the jewelry items whose company is either 'DDmas' or 'Aura'.
6. Display all the jewelry items whose price is between 5000 to 15000.

Specific task Group Member-3

7. Display all the jewelry items which are necklace and price is less than 10000.
8. Display all the jewelry items whose price is more than 20000 and are diamonds.
