

Worker Management System

A Worker Management system is a system where all the details of the workers like wrk_id, wrk_name, wrk_bankac_details, wrk_gender, wrk_adaar_updated, wrk_daily_rate, wrk_overtime_hrs, wrk_over_time_date, date_of_joining. Here a small part of implementation has to be done which are as:-

Create a class called worker_mgmt with above attributes and store the database for 25 workers.

Specific task Group Member-1

1. Display all the workers names whose gender is 'Male'.
2. Display all the workers details whose rate per day is between 200 -350.
3. Display all the workers whose over time hours are less than 5.

Specific task Group Member-2

4. Display all the workers whose adhaar details have been updated on the system.
5. Display all the details of the workers whose bank account details are not yet updated in the system.
6. Display all the workers who have done overtime this month.

Specific task Group Member-3

7. Display all the workers sorted by date_of_joining latest to earliest.
8. Display all the workers whose gender is female and also rate per day is less than 200/-.
